PROFILE

Aspiring web developer with a strong foundation in software engineering, seeking an internship to apply and expand my skills in full-stack development.

I thrive in collaborative environments and enjoy tackling complex problems to create innovative solutions. With a keen eye for detail and a drive for excellence, I am committed to continuous learning and growth in the field of software engineering.

EDUCATION

Nov 2021 — Present Bachelor of Science in Software Engineering, 1337 (UM6P) Khouribga

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, C, C++
- Frontend: React, Next.js
- Backend: Nest.js
- Database: PostgreSQL
- Other: Docker, Git

PROJECTS

Real-time Online Pong Tournament Website

- Implemented using Nest.js, React, Next.js, and PostgreSQL.
- Features: Real-time gameplay, chat, group chat modes, friend status, guilds, and ranking system.
- Demonstrates proficiency in full-stack development and real-time application design.

WordPress System with LEMP Stack

- Built a small system using WordPress with LEMP Stack (Nginx, MariaDB, and PHP).
- Utilized Docker and Docker-Compose for deployment.
- Gained hands-on experience in system administration using containerization.

LANGUAGES

Arabic Native speaker, French Highly proficient, English Highly proficient
